### Profile

- Data Analyst & Machine Learning Engineer skilled in Python, SQL, and applied data science, with expertise in data cleaning, visualization, and predictive modeling to drive strategic insights. Experienced in building AI-powered, full-stack MERN applications, integrating data pipelines and automation into scalable systems.
- Completed internship at Vidhema Solutions as a Software Developer Trainee, developing secure admin dashboards with REST APIs, JWT authentication, and cloud optimizations.
- Proficient in Git/GitHub, ChatGPT, and Generative AI tools for automation and problem-solving. Certified by IBM, Coursera, HP LIFE, and Wadhvani Foundation in AI, Data Analysis, Cybersecurity, Automation, and Financial Literacy. Winner of CodeFiesta 4.0 Hackathon (2025) for innovative AI-driven solutions.

### Skills

- |                                |                              |                          |                   |
|--------------------------------|------------------------------|--------------------------|-------------------|
| • Artificial Intelligence (AI) | • Leadership                 | • Team Lead/Manager      | • C++             |
| • Generative Ai                | • Data Analysis              | • Problem Solving Skills | • Version Control |
| • Project Management           | • Prompt Engineering         | • Java                   | • Python          |
| • Sql                          | • Database Management System | • Web Developement       |                   |

### Experience

#### Software Developer Trainee (Full-Stack), Vidhema Solutions

06/2025 – 08/2025

Completed a hands-on internship developing full-stack web apps using React, Node.js, Express, and MongoDB. Focused on API design, authentication, and performance optimization.

Jaipur, Rajasthan, India

### Certificates

#### Data Analysis with ChatGPT

365 Data Science

#### Git and GitHub
